

Customer Journey Map

Date	04 July 2026
Team ID	
Project Name	Rising Waters – Flood Prediction System
Maximum Marks	2 Marks

The map below captures the resident's experience from noticing risky weather to acting on a flood prediction.

Phase of Journey	Stage 1: Awareness	Stage 2: Input & Prediction	Stage 3: Result & Action
Actions	Notices heavy rainfall / weather alerts	Opens the Rising Waters web app and enters weather details	Views the prediction result and decides on next steps
Touchpoint	TV/radio, social media, local news	Rising Waters web form (Flask app)	Prediction result page
Customer Thought	"Is this rain unusual? Should I be worried?"	"Will this tool give me an accurate answer quickly?"	"Do I need to prepare or evacuate now?"
Customer Feeling	Uncertain, mildly anxious	Hopeful, cautiously trusting	Reassured (No Flood) or alert and motivated to act (Flood Likely)
Process Ownership	Resident / Community	Rising Waters application (ML model + Flask backend)	Resident / Local disaster management team
Opportunities	Push proactive notifications during heavy rainfall	Auto-fill weather data via a live weather API	Add actionable safety tips alongside the prediction
